Definitions

Physical education is a sequential educational program that teaches students to understand and participate in regular physical activity for developing and maintaining physical fitness throughout their lifetimes, understand and improve their motor skills, enjoy using their skills and knowledge to establish a healthy lifestyle, and understand how their bodies work.

Physical activity is bodily movement that is produced by the contraction of skeletal muscle and that substantially increases energy expenditure, including exercise, sport, dance, and other movement forms.

Instructional Time

Instruction in physical education shall be provided for a total period of time of not less than 200 minutes each 10 school days for students in grades 1-6 and not less than 400 minutes each 10 school days for students in grades 7-8. (Education Code 51210, 51222)

This includes instruction and practice in basic movement and fine motor skills, progressive physical fitness and wellness activities through age appropriate activities.

Students will spend at least 50 percent of physical education class time participating in moderate to vigorous physical activity.

At the middle school level, all physical education will be taught by credentialed or appropriately authorized physical education teachers.

Suitable adapted physical education shall be included as part of individual education plans for students with chronic health problems, other disabling conditions, or other special needs that preclude such student's participation in regular physical instruction or activities.

The Etiwanda School District subscribes to a continuing program of physical fitness in grades K-8, consistent with district goals and expectancies which have been developed based upon the state physical education framework.

The Superintendent or designee may provide a make-up date for students who are unable to take the test based on absence or temporary physical restriction or limitations, such as students recovering from illness or injury. (5 CCR 1043)
